To achieve the best print results simply follow these guidelines.

After placing your order you will receive the print file guidelines of your display, the contour and the upload-link by email.

File format:

- **Illustrator or InDesign PDF X-4**
  Save your data as PDF X-4.

or

- **Open Illustrator or InDesign file**
  Add linked images, logos, etc.
  to the compressed (zipped) folder.

Images:

- **Required resolution: 300 dpi, at least 150 dpi**
  The resolution refers to the size
  of the images in the print file
  (pay attention to the change in resolution when scaling)

Fonts:

- **Convert fonts to outlines**

Colour mode:

- **CMYK**

Contour:

- **Leave the contour in its original size
  on a separate layer in your file.**
  You will receive the contour of your display
 by email after placing your order.

Creating the print file:

- **Create your print file in its original size**

Upload:

- Name your file:
  productname_company.pdf or ai/indd
  and upload the file. You will receive the upload-link
  by email after placing your order.

Example

Add a
**10 mm bleed around the
outer cutting line**
to your artwork to allow lee-
way for cutting tolerances in
production.

Keep
**5 mm safety margin
to the cutting lines
and the folding lines**.

Pay attention to the
change in direction of some
surfaces due to the folding of
the display.

The **red lines**
of your contour are cutting lines,
the **green lines**
are folding lines.

You will receive the
**contour for the printed surfaces of
your display**.
Unprinted surfaces, backs or
bottoms are cut out.
